

# Birth Chart (D1) — Overview

Your Birth Chart, also called the **D1 or Lagna Chart**, is a map of the sky at the **exact date, time and place you were born**. A physical blue print of your life. Rather than describing specific events, this chart explains **how you experience life and respond to situations** — your natural way of thinking, feeling, and acting. All deeper insights are explored using this chart as the foundation. Think of it as the overview of your life's mission. While other charts look at specific departments like career or marriage, the D1 tells us about your core existence and your natural orientation towards the world.
